SUMMARY

Data Analyst with strong proficiency in **Python, SQL, and Power BI**, specializing in **data cleaning, exploratory data analysis (EDA), and dashboard development**. Experienced in analyzing large datasets (100,000+ records) to extract actionable insights and support business decision-making. Skilled in **KPI tracking, trend analysis, and data visualization**, with hands-on experience in real-world projects including customer churn, sales performance, and content analytics.

SKILLS

- **Programming & Querying:** Python (Pandas, NumPy, Matplotlib, Seaborn), SQL
- **Data Visualization & BI Tools:** Power BI, Microsoft Excel (Pivot Tables, VLOOKUP, Data Analysis)
- **Core Data Analytics Skills:** Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Statistical Analysis, Data Visualization, KPI Monitoring, Business Intelligence Reporting
- **Tools & Platforms:** Git, GitHub, AI Tools (Claude AI, Julius AI, Formula Bot)

EXPERIENCE

Data Analyst Intern

Self / Academic Projects | 2025 – Present

- Analyzed large datasets (7,000+ records) using **Python and SQL**
- Collected and aggregated data from multiple sources (CSV, APIs, datasets)
- Designed and managed structured datasets using SQL
- Built **interactive Power BI dashboards** with KPIs and business metrics
- Performed **data cleaning, preprocessing, and EDA**
- Generated insights for **customer churn, sales trends, and content analysis**
- Supported **data-driven decision-making** through reporting and visualization

PROJECTS

Customer Churn Analysis | Data Analyst Project

- Scrutinized **7,000+ customer records** to identify key factors influencing churn and retention.
- Performed **SQL-based data extraction and segmentation** to study customer activity.
- Developed an **interactive Power BI dashboard** with 6+ KPIs to track churn metrics.
- Delivered insights to support **customer retention strategies and business decisions**.

Sales Data Analysis (Superstore Dataset)

- Processed and examined **9,000+ sales transactions** to uncover revenue trends.
- Evaluated **regional performance, profit margins, and product categories**.
- Built **10+ visual dashboards/reports** to present business insights.
- Enabled **data-driven decision-making** through trend and performance analysis.

Trader Performance vs Market Sentiment

- Investigated **100,000+ crypto** trading records with Fear & Greed sentiment to study market behavior and performance patterns.
- Built data pipeline using time-series preprocessing and daily-level aggregation to align trading and sentiment datasets.
- Engineered core trading metrics including PnL, win rate, leverage, trade size, and long/short bias.
- Identified strong correlation between sentiment regimes and trader activity, profitability, and risk-taking patterns.
- Found improved performance during Extreme Greed and reduced activity in Extreme Fear conditions.
- Quantified leverage impact, showing higher returns but significantly increased risk exposure and volatility.

EDUCATION

Bachelor of Science in Data Science

Indian Institute of Technology Madras

2024 – Present

Relevant Coursework: Data Structures & Algorithms (Python), DBMS, Statistics for Data Science, Mathematics for Data Science, and Modern App Development.

CERTIFICATIONS

- Foundational Level in Programming and Data Science — IIT Madras
- Python for Data Science, AI & Development — IBM
- Databases and SQL for Data Science — IBM
- Data Analytics Bootcamp — Alex Freberg
